Easy Network Infrastructure by PoE Function

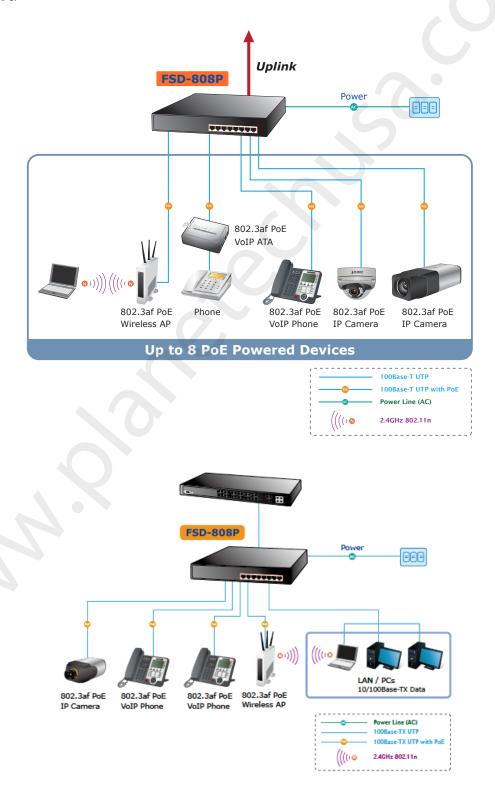

With 8 IEEE 802.3af PoE port interfaces, the FSD-808P is ideal for small businesses and workgroups seeking to deploy PoE applications such as wireless access points, IP-based surveillance cameras or IP phones at any location. The IEEE 802.3af standard enables the FSD-808P to power 8 PoE compliant devices at distances of up to 100 meters via its 4-pair Cat 5/5e UTP wire. With data and power delivered via the Ethernet connection, the FSD-808P can reduce the need for extension cords and electrical outlets that are hard to reach or absent. The device simplifies installation and reduces installation costs.

Application

Department / Workgroup PoE Switch

With 8 PoE port interfaces, the FSD-808P can easily be used to build a powerful centrally-controlled IP phone system, IP Camera system or wireless AP group for an enterprise. For example, up to 8 PoE IP cameras can be installed in a company for surveillance purposes or 8 PoE Wireless APs can be used to build a wireless roaming environment in an office. Without the limitations of requiring additional power outlet sources, the Switch simplifies the installation of cameras or Wireless APs.
