The MasterCase H500P Mesh White will blow you away with its looks and performance! Two impressive 200mm RGB fans behind the mesh front panel and two optional 200mm fans on the top will provide all the airflow you need.

Armed with a tinted tempered glass side panel and transparent top panel, your RGB fans will shine bright and true. The rugged, futuristic look and the structured bar design are inspired by the former High AirFlow series. With options such as built-in vertical graphics card mounting, a customizable PSU shroud, and various cable covers you can really personalize your build, all the while keeping it clean and neat.

Radiators up to 360mm are fully supported both in the top and front, so build a system that looks clean and cool, with performance that is even cooler.

Features

Two 200mm RGB fans behind Mesh front panel – Optimized airflow is guaranteed with a complete mesh front panel providing plenty of air intake for the two pre-installed 200mm RGB fans. Use the RGB lighting to create a captivating build in your preferred color theme.

Covers for Clean Building – A PSU shroud, CPU cut out, and additional cable covers take clean cable management to the next level. Assemble clean builds like a pro!

Show Off Your Graphics Card* – Two additional PCI slots at the rear enable you to show off one graphics card in the vertical position.

Clear View Inside – The MasterCase H500P Mesh White has a light grey tinted tempered glass side panel making it ideal for showcasing your build with (RGB) lighting.

Liquid Cooling Ready – The MasterCase H500P Mesh White accommodates up to 360mm radiators on the top and front.

RGB controller and 1 to 3 Splitter Cable for RGB LED Fans – The included RGB controller can be connected to the Reset Switch to manage the lighting of the two 200mm RGB fans. Also the RGB Connector Splitter and 4 pin male to male adapters are included.
