

OTG M152

Breaking the Limit

of Transfer

USB Drive | M152

Team USB Drive OTG | M152

Breaking the limit of transfer

Transfer has never been this easy before

The all new Team M152 from Team Group is the world's first smallest multifunctional OTG flash drive which supports wireless transfer software. With the rise of mobile devices, smart handheld devices have become very popular already. How to make smart devices even more user friendly and more convenient? Team M152 will be the solution that you shouldn't miss.

From the appearance, Team M152 simply looks like a USB drive. In addition of using on general computers, through a network environment with the same IP address, users are able to wirelessly share photos, videos, multimedia and mirror screen on the computer simply by

plug it into the computer and start up the software and the smartphone APP*. Using the included micro-B adapter, it can even be used as an OTG flash drive. It truly combines computer, handheld device and wireless transfer all together to satisfy your needs in life in every way.

*Note: This M152 flash drive is built-in application software, Do not format the M152, the software will be lost and can not be used!!

About M152 has filed Patent application for wireless data transmission method and it's operation screen.

M152's micro compact design is different than the ordinary wireless transfer devices. With their large size and heavier in weight causing by the built in Wi-Fi module and the battery, ordinary wireless transfer devices are inconvenient for mobile usage. The mini size M152 is only 2.5g. That makes sure it won't interfere with other accessories while using on computer or car audio system.

The excellent design has truly make Team M152 a product with multifunction and unlimited enjoyment.
