

Team Mac

Module | Team Mac Series

Team Mac (DDR3 1600/1333/1066)

Team Mac SO-DIMM is not only completely compatible with the Mac operating system, also passed Mac verifications, completely solving the troublesome compatibility problems for Mac users. Team Mac inherited Team Group's standard persistence for quality, and uses memory particles rigorously selected and tested by Team Group to guarantee optimal and excellent operating performances. In addition, Team Mac memory modules are made of single channel and dual channels, with capacities ranging from 2GB~8GB to satisfy users' unlimited demand for upgrading!

The all new Team Mac SO-DIMM memory modules also break the mainstream rules by adopting heat-sinks on the SO-DIMM to protect the chip from collision. The heat skin can also help disperse heat more efficiently, providing a more stable operating environment. It uses aluminum to create a super lightweight case, which delicately compliments with the design of Macbook / Macbook Pro. The Team Mac SO-DIMM takes the lead in bringing memory modules into a new lightweight trend!

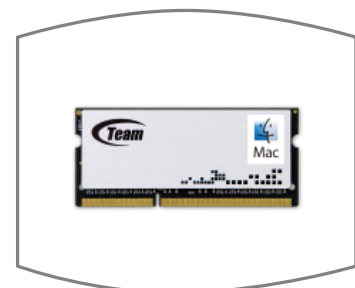

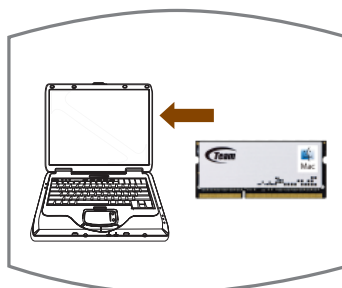

Main Feature

- ☐ Larger capacity: 2GB / 4GB / 8GB
- ☐ Faster speed: DDR3-1600 、DDR3-1333 、DDR3-1066
- ☐ Greater performance: MAXIMUM COMPUTING SPEED UP TO 12,800MHZ
- ☐ Energy saving: 1.5V / 1.35V
- ☐ Superb cooling: Heatsink with excellent cooling performance

Specification

Item	Specification
PC type	Notebook
Module specification	204 Pin SO DIMM Non ECC
Die layout	128x8 / 256x8 / 512x8
Capacity	2GB / 4GB / 8GB
Data transfer bandwidth	8,528 MB / Sec (PC3 8500) DDR3-1066
	10,664 MB / Sec (PC3 10600) DDR3-1333
	12,800 MB / Sec (PC3 12800) DDR3-1600
CL-value	7-7-7-21 / 9-9-9-24 / 11-11-11-28
Working voltage	1.5V / 1.35V
PCB structure	8 Layer PCB
Extra features	Aluminum heat-sink (According to the actual products)
Warranty	Lifetime warranty

Ordering Information
