

4 IN 1 X OTG READER

For Mobile Device & PC

Product Features

- An all-in-one OTG device that satisfies all your needs
- Innovative combined USB Hub for establishing intelligent multi-directional data transmission and synchronization
- Fashionable aluminum brushed finish with refined taste, makes you the focus of everyone's attention wherever you go
- Embedded dual connectors and cables, eliminating the problem of forgetting to bring the cable along with you
- Easy transmit data between computer, memory card, and mobile device

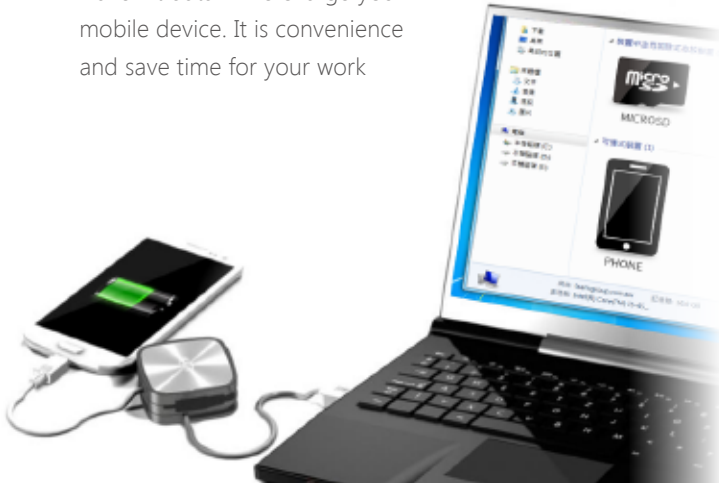

Bring out all kinds of accessories is how cumbersome and take up space. The launch of the innovative Twinbo breaks the limitation that conventional OTG device has only one single function. Twinbo implements the idea of living a simple life by smartly combine and strengthen the function of card reader, data transfer cable, charging cable, cable reel, OTG device, flash drive, etc. Not only able to satisfy the user of mobile device's various needs once for all, but it can also saving time, energy and money.

Twinbo allows you to access the data directly through your mobile device. It can a be used as PC card reader and allows the computer to identify between mobile device and memory card. Multi-synchronous transmission of wisdom to the data, allowing you to share data more easily.

Twinbo has been granted the utility patent and won the 2015 Taiwan Excellence Award , the highest honor for overall domestic products in Taiwan. It is unique in both function and design. Aluminum brushed finish brings out its elegant texture and refined taste. It is lightweight and easy to carry, yet loaded with many practical functions. The embedded design of dual connectors and cables shows the perfection of the human factor engineering. The thoughtful design of a loop makes it easy for consumers to hang it at anywhere or just place it as an exquisite fashion accessory. Twinbo is definitely a boutique worthy to collect for the users of mobile devices.

1/ USB Hub Mode
